

product data sheet - please read carefully before ordering:

Product: uzi acrylic shelving

Supplied as standard:

Bespoke made acrylic shelving manufactured in 5mm thick acrylic material (specified by customer)

Standard width of 250mm from wall x 60mm deep (50mm internal depth from material). Length specified by customer (**2M max per module**)

Rigid 1/4" thick aluminium extruded channel supplied with pre-drilled wall mounting location holes & M6 st/st cap screws for securing top & lower section of each module. Very easily secured as each shelving module simply slots over wall mounted extrusion (**also allows for simple fitting in-between wall cavities too**)

Optional:

10mm transparent acrylic joining blocks for connecting module lengths together - non visible from external viewing

End enclosures (manufactured separately in corresponding material if requested) with internal machined magnetic blocks for secure fastening

Lighting Options:

High quality, low maintenance & economical **warm or cool white LED strip** available (mains / 24watt) in **multiple lengths of 200mm** for insertion into shelving channel (includes plug end fixture per length). 200mm lengths can also be easily cut from strip if necessary using a suitable cutting knife. If the LED strip is ordered - an aluminium channel is also supplied securing the lighting strip inside the main channel / shelving unit.

2 x LED rows of strip lighting can also be supplied located inside the shelving for maximum brightness. This needs to be confirmed when specifying for quotation purposes

Mains UK 24watt power driver (ordered individually) to power LED strip (qty's to be confirmed by customer through quotation)

2 core flying lead lengths (specified by customer)

How to order / terms & conditions of sale:

This product is made to order only with no minimum order value or qty. It is recommended that customers' plan their requirements very carefully before a quotation is supplied. Once the quotation has been accepted, all new customers will be sent an initial PROFORMA invoice for **50% upfront payment of the total price. Orders can only be officially processed once this payment has been received & payment cleared. A 50% balance payment is then expected immediately upon delivery** (unless agreed otherwise) which will be invoiced accordingly

Delivery:

3-4 weeks is the expected lead time for most orders to be completed. All delivery costs for this product will be included on the quotation

Additional notes:

Max loading weight for shelving is approximately: 30 KG

Acrylic material is supplied with a 10 year manufacturer's warranty for UV protection

Please contact UZI design if you wish to discuss this product further or to receive a free quotation
